

TC8

**GREEN PLANTS
SUBSTRATE
COARSE**

RECIPE NO. **08F1000**

APPLICATION

Well-structured white peat substrate with a high structure stability and improved drainage capability for ideal growth conditions of root-sensitive crops, i.e. Anthurium, Spathiphyllum and ferns.

- TC BLUE** **TC BLUE SPECIAL** **CUSTOMER REQUEST**
- TRAYS / POT SIZE** **5-8 cm** **9-12 cm** **12-14 cm**
- CONTAINER** **1-3 L** **3-5 L** **> 5 L**

PHYSICAL CHARACTERISTICS

Composition: 100 % Sphagnum White Peat

- SUPER FINE** **FINE** **MEDIUM** **MEDIUM COARSE** **COARSE** **EXTRA COARSE** **COARSE FIBROUS**

Wetting agent - improved water absorption

CHEMICAL CHARACTERISTICS

Chemical properties at the time of manufacture

NPK 14-16-18 + Microelements*	1.2 kg/m ³
Nitrogen	170 mg/l
Phosphate	190 mg/l
Potassium	220 mg/l

* Magnesium, Boron, Molybdenum, Copper, Iron as Iron-Chelate, Manganese, Zinc. Fluctuations in the chemical properties are within the permissible tolerance range.

Fluctuation range according to quality regulations for substrates of the "Gütegemeinschaft Substrate für Pflanzen e.V."

NOTES ON STORAGE

KEEP AWAY FROM DIRECT SUNLIGHT!

KEEP DRY!

TEMPERATURE LIMITS:
MIN. 0 °C / 32 °F
MAX. 20 °C / 68 °F

The product has been manufactured with the greatest possible care and is intended for immediate use. Store in a cool and dry place, especially during longer storage, and protect from direct sunlight. If stored properly, no significant chemical changes are to be expected in the first 6 months. High temperatures and high humidity lead to increased microbial substance degradation and volume loss. For long stored substrates, we recommend as a precautionary measure a chemical substrate analysis and, if necessary, a germination test.

If you have any questions about the product, please contact us at service@terracult.com

DELIVERY OPTIONS

70 L, 250 L, 300 L, 5,800 L

The availability of the package size depends on the constitution (e.g. weight) of the substrate mix.
